Area of Expertise

My purpose is to ensure our neighbors, families, and communities live healthier, better lives. I am excited to work inter-professionally to deliver the pharmacists of the future, enhance the patient's medication experience, and promote discovery of better treatment options for society. Our college was purposefully built on our values and driven to discover better solutions to advance care by uniquely positioning pharmacists to be part of the health care and research teams. I look forward to collaboratively advancing this as One University in enduring, meaningful ways.

Qualifications

BS in Pharmacy, Auburn University
PharmD, Auburn University
